

# **RR 309 ROCK N' RESCUE ADOPTER INFORMATION**

**\*\*PLEASE READ ALL INFORMATION\*\***

## **HEALTH**

**RNR** requires a **MANDATORY** 48-72 hr post adoption check up and stool sample check for **ALL** cats – even though they have just had their health visit just this past week, the transition from foster to rescue to new home can trigger stress and illness. They are also coming from a different climate etc... - Please give us a follow up text/email no matter results

Call if your kitten... has sneezes, runny eyes or nose, weird poop, is not urinating/pooping, lethargic, blood in stool, vomiting, limp, worms, fast breathing, coughing, wheezing, or other symptoms

For tiny kittens **do not leave alone in home unattended in large area until older** – use crate or small room

If **ANY** symptoms occur please **IMMEDIATELY** contact Juli and Marla via **GROUP TEXT** at **our cell numbers listed on all our emails to you** any hour for guidance

**Vet Recommendation: Fieldstone Veterinary Clinic – Dr. Cary Brenner/Dr Nadja Raver - 4 Cottontail Rd, New Fairfield, CT 06812 Phone: (203) 746-5555 (free wellness exam and discounts too!) – our vet**

**Progressive Animal Hospital – Somers, NY – Phone (free wellness exam and deworming plus discounts)**

**Carlstadt Animal Hospital – Dr. Jose Pla – Carlstadt, NJ – Phone – our vet especially for dental**

## **FOOD AND FEEDING INSTRUCTIONS**

**Kittens** - ½ can small can food 2x a day (more if growing and finishing)

**Adult Cats** – 1/2-3/4 can 2x a day, Adult PREMIUM (NO Meow Mix Deli Cat etc... can cause health problems)

**For All CATS** - ¼ cup Dry Food all day UNLESS cat is overweight (then give more canned) --- Water changed 2-3x a day

Chicken varieties of food are gentler to the stomach. Most cats/kittens have been on **SCIENCE DIET HEALTHY DEVELOPMENT WET AND DRY** ---- Cats are Lactose INTOLERANT so no milk. They can have Kitten Formula or watered Goat Milk

Canned Pumpkin, finely chopped cooked chicken or turkey (no skin or spices), no salt cooked fish are all ok to feed – DO NOT FEED UNCOOKED MEAT OR FISH --- Watch out for PLANTS and RUMBERBANDS/HAIR TIES/WIRES – cats are attracted to all

## **LITTER INSTRUCTIONS**

**Fresh Step** Multii Cat scoopable or non clumping - has natural attractant so is preferred to start (one box per floor) --- NO electronic or doored litter boxes initially especially for several months for kittens
